

Medication Administration (Student) Policy

Administration of Medication

From time to time it may be necessary for medication to be administered to students during college hours, or whilst on excursions, in order to keep them safe.

Padua College's Policy

In the event that it is necessary to administer medication to a student it is our policy that:

- Staff do not administer medications (even minor analgesics such as paracetamol) to students without written authorisation from the student's medical practitioner, using the Padua College [Student Medical Management Plan](#)
- Prescribed medication will only be administered where a student's parent/carer has provided written permission to the college;
- Parents/carers are responsible for keeping the college updated if the requirement for prescription medication changes;
- Parents/carers are responsible for providing the prescribed medication and to collaborate with the college in working out arrangements for supply, administration and storage of the prescribed medication;
- Students must not carry medications unless there is a written agreement between the college and the student's parents/carers that this is a planned part of the student's health plan;
- Where it is appropriate and safe to do so students should self-administer prescription medication under staff supervision;
- The college shall provide appropriate first aid facilities; and
- The college shall employ a college Sick Bay Officer and ensure that teaching staff have appropriate first aid training.

Procedure

The following safety procedures shall be followed when dealing with the administration of medication:

Maintenance of Medical Records

Parents are requested to notify the college of all medical conditions that may require the administration of prescription medication during college hours. Student medical records are maintained in accordance with our [Student Medical Records Policy](#) which includes a provision to ensure that Padua College is regularly updated as to the status of existing medical conditions.

Parent/Carer Responsibilities

Parents of students who require prescribed medication to be administered during college hours must notify the college of this requirement and collaborate with the college in working out arrangements for supply, administration and storage of the prescribed medication.

For any medications that a student may require to be administered at the College or during College activities, parents / carers must provide signed authorisation by a medical practitioner, using the Padua College [Student Medical Management Plan](#)

Parents are obliged to keep the CareMonkey profile for their student updated at all times. In particular the specific Medical Alerts and associated notes.

Student Health Plan

A health plan should be developed for each student who is required to take prescription medication during college hours. The plan should specify agreed arrangements for supply, administration and storage of the prescribed medication. The health plan shall be stored appropriately and updated regularly. It shall be communicated to relevant staff in a confidential manner. Each staff member shall fulfil their agreed roles as documented in a student's individual health plan and the college shall inform parents as soon as possible of concerns regarding a student's health care arise.

Self-Administration

Where it is appropriate and safe to do so students should self-administer prescription medication under staff supervision.

Staff Administration

Where prescription medication is administered by staff:

- The act of administering the medication should be undertaken in the campus Sick Bay, if possible;
- The college Sick Bay Officer, or another staff member with first aid training, should be primarily responsible for administering the medication;
- Two staff members should be present when medication is administered, one with primary responsibility and one as an observer;
- The staff member with primary responsibility shall select the student's medication and appropriate dosage;

- The observer is responsible for confirming the name on the packaging and that the correct medication dosage is to be given to the student;
- The staff member with primary responsibility should record the student's name, medication and dosage in the Medication Administer Book and sign their name; and
- The observer should witness the entry confirming the fact that the appropriate medication and dosage have been given to the right student.

Storage of Medication

In some cases a student's immediate access to prescribed medication is very important for the effective management of conditions such as asthma (Refer to our [Asthma Management Policy](#)) and it is appropriate that the student carry the medication on their person. In other circumstances prescribed medication must be stored safely and access must be restricted to staff members. All medication must be appropriately packaged and clearly show the name of the medication, student's name, dosage and frequency of the dosage.

Note Regarding Emergency Care

The college will not generally supply or administer medications in an emergency unless the provision of such assistance is part of a student's health plan (Refer to our [Anaphylactic Shock Management Policy](#)). It should be noted however that in any life threatening situation the welfare of the student is paramount and must be dealt with, with immediate priority, notwithstanding the absence of an appropriate health plan. (Refer to our [Accident Management Policy](#)).

Workers' Responsibility

Padua College workers are responsible to ensure that they:

- Have the knowledge and skills to support and manage students who have medical conditions and to fulfil their agreed roles if included in a student's health plan.
- Are familiar with the medical records and individual health plans of students in their care, respecting the confidential nature of the information at all times.
- Work with other staff and professionals, in consultation with parents/carers to ensure the safety of students with specific health needs.
- Notify the Principal and inform parents/carers as soon as possible of concerns regarding management of the student's health care.

Implementation

This policy is implemented through a combination of:

- Staff training and supervision;
- Maintenance of medical records;
- Effective incident notification procedures;
- Effective communication procedures with the student's parents/carers and the students themselves; and
- Initiation of corrective actions where necessary.

Discipline for Breach of Policy

Where a staff member breaches this policy Padua College may take disciplinary action.
